PROFILE

Detail-oriented BS Computer Science student specializing in Artificial Intelligence, particularly interested in front-end development to create functional, human-centered interfaces. Builds clean, accessible interfaces through feedback, teamwork, and strong time management skills.

TECHNICAL SKILLS

- Web Development: HTML, CSS, JavaScript, Framer
- UI/UX & Design: Canva, Figma (Wireframing & Interactive Prototyping)
- Data Science & Programming: Python, JavaScript, C++, MS Excel, Machine Learning Concepts
- Content & Digital Media: Social Media Content Creation, Caption Writing
- Productivity & Documentation: Microsoft Word, Excel, PowerPoint, Document Encoding and Data Management

PROJECTS AND ACHIEVEMENTS

Iloilo Directory

April 2026

Graphics Designer and Quality Assurance

Link: <https://iloilo-directory-rwlz.vercel.app>

- Performed quality assurance activities by reviewing website functionality, monitoring and merging pull requests, and identifying issues to ensure system quality and responsiveness.
- Creating a UI/UX design and front-end implementation by developing wireframes, visual assets, and interface layouts to enhance user experience and maintain design consistency.
- Contributed to website content development by creating and refining captions, FAQs, and other digital materials to improve clarity, readability, and user engagement.

EMERGE: Disaster Response Mapping System | Undergraduate Thesis

December 2025

Manuscript Editor

Link: <https://www.projectemerge.org>

- Contributed to the creation of a data-driven mapping solution for Santa Barbara, Iloilo, supporting risk-based optimization of emergency response locations using Python and Next.js.
- Managed technical documentation and manuscript revisions, ensuring conformity with academic standards.
- Conducted usability testing with domain experts to evaluate system functionality, identify potential issues, and gather actionable feedback for design improvements.

WestTrack | Group Project

System Analyst

Link: <https://westtrackg.vercel.app>

- Developed and structured the Software Requirements Specification (SRS), defining system scope, functional and nonfunctional requirements, and process flows.
- Collaborated with stakeholders to gather, validate, and refine system requirements.
- Reviewed and verified requirements to ensure accuracy, completeness, and feasibility.

Espas.yo | Group Project

UI/UX Designer

Link: <https://www.figma.com/design/>

- Designed wireframes to define the app's layout and structure.
- Contributed in creating interactive prototypes and user flows to visualize user interactions and app functionality.

WESTnovation Challenge 2025

- Won 2nd Runner up and Social Impact Award

EDUCATION

West Visayas State University - Main Campus

La Paz, Iloilo City

BS in Computer Science, Major in Artificial Intelligence

August 2022 - June 2026

- Academic Honors: Consistent Dean's Lister (2022 - 2026), Magna Cum Laude
- Organization: **CIPHER**

July 2024 - June 2026

- Attended academic workshops and collaborative sessions to enhance skills and knowledge.
